SUMMARY

Dedicated and skilled Full Stack Developer with 2 years of hands-on experience in web development. Proficient in HTML, CSS, JavaScript, Bootstrap, MongoDB, Node.js, and Python. Adept at creating and implementing innovative solutions to meet business requirements. Strong problem-solving skills and a passion for clean and efficient code.

SKILLS

Frontend	Html, CSS, Bootstrap, JavaScript ,ReactJs
Backend	NodeJs, Express.js, MongoDB
Technical	Python, Pug
Soft Skills	Figma, Github, AWS, Googling
Other	Photo/Video Editing, Guitar, Communication

EXPERIENCE

Full Stack Developer

1 Years

Mindtree

Delhi, India

- Developed and maintained web applications using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and responsiveness.
- Implemented server-side logic using Node.js and Python, ensuring seamless integration with front-end elements.
- Designed and managed databases using MongoDB, optimizing performance and ensuring data integrity.
- Collaborated with cross-functional teams to understand project requirements and deliver high-quality solutions on time.
- Conducted code reviews and provided constructive feedback to team members, contributing to a culture of continuous improvement.

Junior Full Stack Developer

1year

Cabot Technology

Work From Home

- Contributed to the development of web applications, incorporating best practices in HTML, CSS, and JavaScript
- Assisted in the design and implementation of backend functionality using Node.js and Python.
- Collaborated with the QA team to identify and resolve bugs, ensuring a smooth user experience
- Participated in regular team meetings to discuss project progress and address any challenges faced during development.

PROJECTS

[Link](#)Netflix CLone.

- The project aimed to replicate the user interface and functionality of the popular streaming platform Netflix.
- Full-stack development using technologies like HTML, CSS, JavaScript for the frontend.
- Backend development with a framework like Node.js and Express.js.
- Database management using a relational database like MySQL or a NoSQL database like MongoDB.
- Implementation of a RESTful API for communication between the frontend and backend.
- Ensured a responsive and mobile-friendly design to accommodate users across various devices.

[Link](#)Cynthia Ugwu Clone.

- The project aimed to create a personal website inspired by Cynthia Ugwu, incorporating her branding, content style, and possibly featuring a portfolio, blog, and other relevant sections.
- Utilized a modern tech stack, including HTML, CSS, and JavaScript for frontend development.
- Employed a backend framework like Node.js with Express.js for server-side development.
- Chose a database solution, such as MongoDB or MySQL, for managing dynamic content if required.
- Integrated a version control system like Git for tracking changes and collaboration.

[Link](#)Food-Serving-Website.

- The project aimed to develop a dynamic food-serving website, providing a platform for users to explore a variety of cuisines, place orders, and potentially interact with restaurant features.
- Ensured a responsive and user-friendly design to provide a seamless experience across various devices, including desktops, tablets, and mobile phones.
- Implemented real-time order tracking and notifications to keep users informed about the status of their orders from preparation to delivery.
- Utilized a full-stack approach with technologies such as HTML, CSS, JavaScript for the frontend, and Node.js or Django for the backend, along with a database system like MongoDB or PostgreSQL.
- Set up a system for continuous improvement, including regular updates based on user feedback, feature enhancements, and bug fixes.

EDUCATION

10+2, Griffin Public School

Expected 2023
